Re:

~~PERSONAL AND CONFIDENTIAL~~

b7D

Dear Sir: Attention: Assistant Director S. J. Tracy

Enclosed are telegraphic messages numbered 1 to 3 inclusive, some of which are in plain language and some in code, which are

With regard to those in plain language, it is requested that this office be furnished with two copies on onion skin paper of complete translations and that a separate sheet be used for each message if practicable. It will be noted that they are numbered chronologically. It is requested that the translations be numbered to conform with the message enclosed herewith.

With regard to those in code, it is requested that the Bureau attempt to furnish decodes to this office in the same manner as outlined above with regard to those in plain language. In addition, in the event it is found such messages cannot be decoded, it is requested that the messages be copied as they are and that copies of the messages in code be returned as outlined above. This additional request is made at this time for the reason that the Bureau may be in a position at a later date to decode such messages and furnish plain language text to this office. At such time the coded copies returned to this office will be destroyed and the plain language messages inserted numerically in our message file. In this way we will be able to examine a complete file of these messages over a long period of time and when considered with other information already available, develop a more accurate picture of the espionage activities, if any exist, with regard to these persons in this Field Division.

If any plain language messages in the English language are included in the enclosures, it is requested this office simply be supplied with two copies numbered to conform with the enclosures.

It is my thought that the above plan will not only supply this office with a complete message file regarding these persons as mentioned above but that the originals retained in the proper Bureau files will, when correlated with other information already there, be of considerable value to the Bureau in combatting espionage in this country, in supplying various Field Offices with investigative material, and possibly in connection with certain other activities.
